# Global Footprints

Katchey also exclusively represents LEEISA Inc., a U.S.A based corporation, which specializes in the export of sophisticated state-of-the-art analytical instruments, laboratory chemicals and consumables, and SCIACHEM in the UK, which covers European and Asian manufacturers. These alliances, which enable Katchey to offer a portfolio of excellent quality laboratory products from leading manufacturers around the world while placing Katchey ahead of other companies in Nigeria.

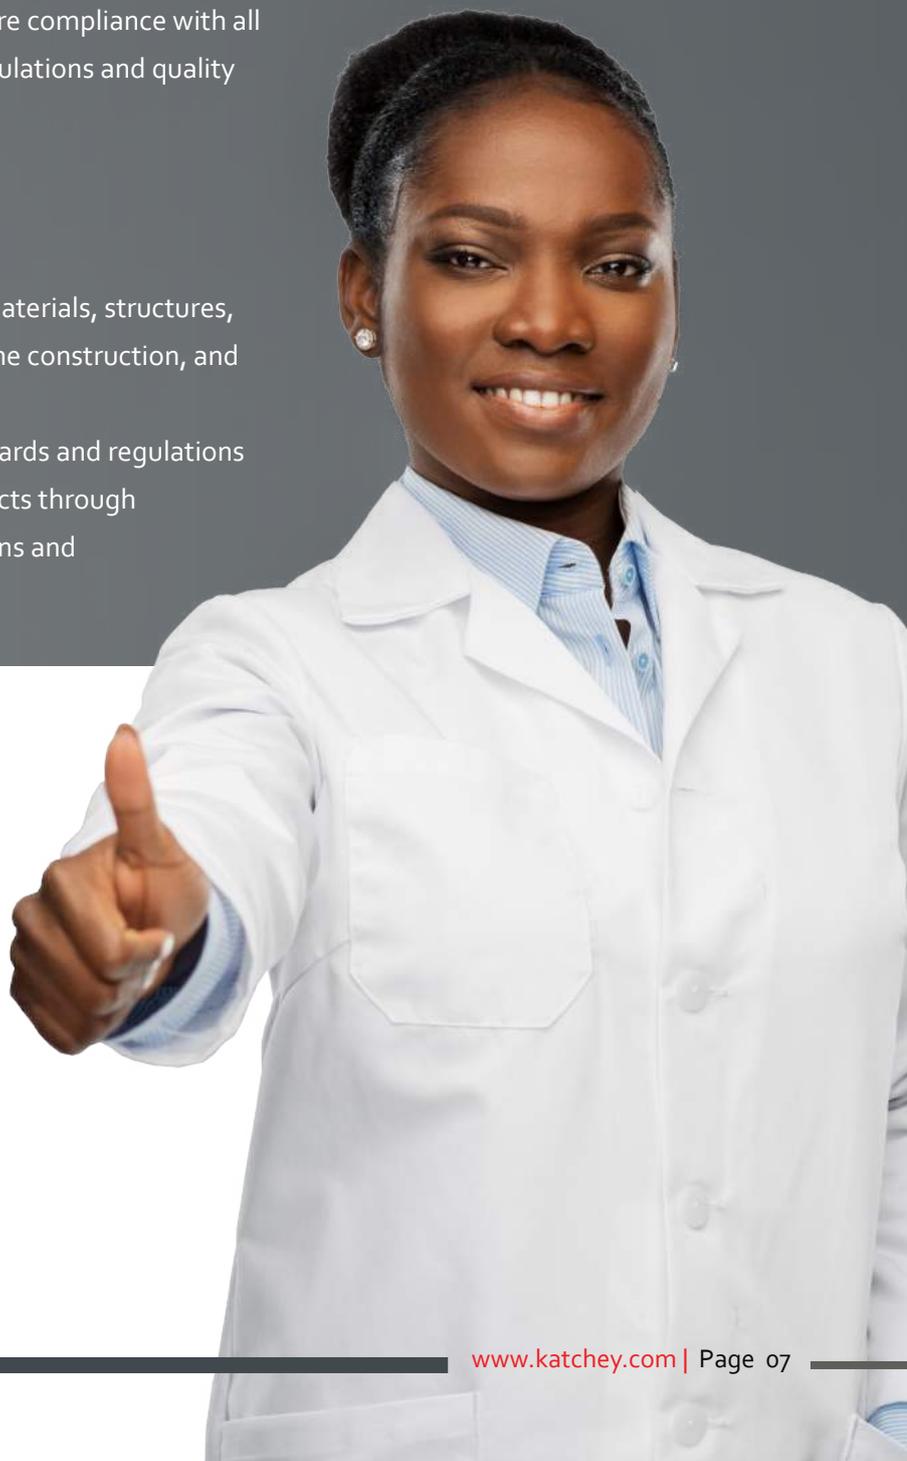

# Our Quality Assurance

When it comes to your laboratory facilities, the quality of all equipment, materials, structures and components is subject to strict regulations and standards. Katchey quality assurance and quality control services help you ensure compliance with all contractual specifications, mandatory regulations and quality standards.

We can help you:

- Assure the quality of all equipment, materials, structures, components and systems utilized in the construction, and operation of your laboratory.
- Comply with all relevant quality standards and regulations
- Verify materials, parts and final products through independent checks, audits, inspections and witnessing

KATCHEY has been certified with NIS ISO 9001:2015.

The FIRST Nigerian Company to Equip Science in conformity with QMS standard

# OUR SERVICES

Our solutions are streamlined to speak to the needs of science functionaries today, whether new equipment or updates on existing instrumentation. Our focus remains to boost productivity while also delivering value using global standard equipment to make impact per industry.

## We serve in the following industries

Education

Manufacturing

Government

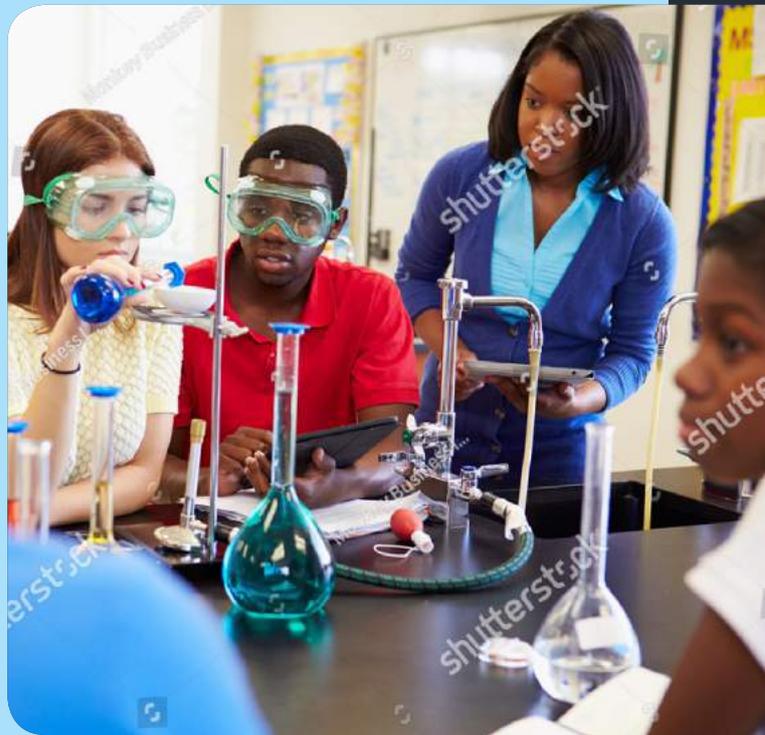

Oil & Gas

# Education

As a result of inadequate and outdated equipment within science faculties across secondary schools, colleges and universities, students are deprived relevant experience and exposure in their learning processes. These conditions have served as limitations to the strong potential of the Nigerian science student at every level since science laboratories remains central to the teaching and practice of science.

Our team focuses on providing learning institutions with modern and digitized lab equipments to equip the student with valuable hands on experience that can empower their learning, and provide new knowledge to complement their know-how.

To this course, Katchey Company Ltd have donated on several occasions fully equipped science labs, with state of the art digital equipment. We work hand in hand with the Federal Ministry of Education to identify the gaps, and come up with a suitable approach to fully equip them with modern equipment, or set up labs where they were non existent.

At Katchey we partners with institutions, and drive initiatives that draw attention to science education in Nigeria and ways to make it better, because we believe completely, that this will aid in research and discovery of products or solutions that are of immense value to Nigeria.

“

*We have been using Katchey as our exclusive vendor for years. They are an excellent supplier and together we have furnished and installed many laboratories at our various factories. have had the same contact since the first project we ran together .*

*-Aderemi Adepoju, Quality Assurance Manager,  
DANGOTE SUGAR*

”

# Manufacturing

Growth in the manufacturing and consumer good industry is dependent on a few things amongst which are research and development, innovation and productivity. At Kitchey Company Ltd, we service players in this industry by providing fully functional and digitized labs for production, testing and compliance tests.

We work actively to raise standards and drive productivity growth and innovation. Manufacturing is the driver of productivity increase in any economy, which explains the close link between industrialization and economic development, and this in turn becomes the driving force behind technological advancement.

At Katchey, we have laid the groundwork for a wide range of advancements in the manufacturing industry, with the understanding that to innovate, the manufacturing processes must be digitized to ensure less hands, faster turn around time and clearly identified results.

# Government[

Katchey Ltc is also responsible for servicing key government agencies and parastatals through providing fully set up laboratories, or equipments within existing laboratories in agencies involved in scientific research, in the areas of natural science, technology, and social science.

Government laboratories and research institutes make discoveries that save lives, enhance technology, and open up new possibilities. They take us deep into the genetic code, underpin our energy, and propel us toward excellence. This however cannot be achieved unless the right facility is put in place.

We offers guidance and strategic direction, to help design, implement and build capability. We don't set up laboratories alone, our mission is to make science relevant at each levels we engage, we work tirelessly to see that our customers accomplish their goals post project completion, and give whatever it takes to help them make the most of the resource.

We have worked with the government on needs assessment projects to identify gaps and have worked on implementation roles with our internationally trained in house engineers who provide installation, maintenance, repairs, training in key areas like operational training, application and professional training on equipment, whilst offering unparalleled advice on establishing new facilities.

# Oil & Gas

Katchey Ltd offer services in the oil and gas industry which range from laboratory setup to testing product components and petroleum byproducts of crude oil, fuel, natural gas, and upstream oil and gas. We have worked with different firms in providing oil and gas laboratory design and procurement services – Leveraging a wide range of laboratory solutions tailored to meet your needs and circumstances. With a globally accepted laboratory standard we provide stesting and analytical services on a 24/7 basis, conforming to industry and regulatory standards in which the sector/industry operates.

We believe that getting the right equipment, properly installed, and functioning, would aid in the successful operation of oil refineries, chemical plants, gas processors, storage terminals, pipelines, tankers, and more. Any certified laboratory outsourcing evaluation can be guided and assisted by our experienced team of laboratory professionals. Quality assurance (QA) and quality control (QC) testing to comprehensive research and development (R&D) operations are all part of our process.

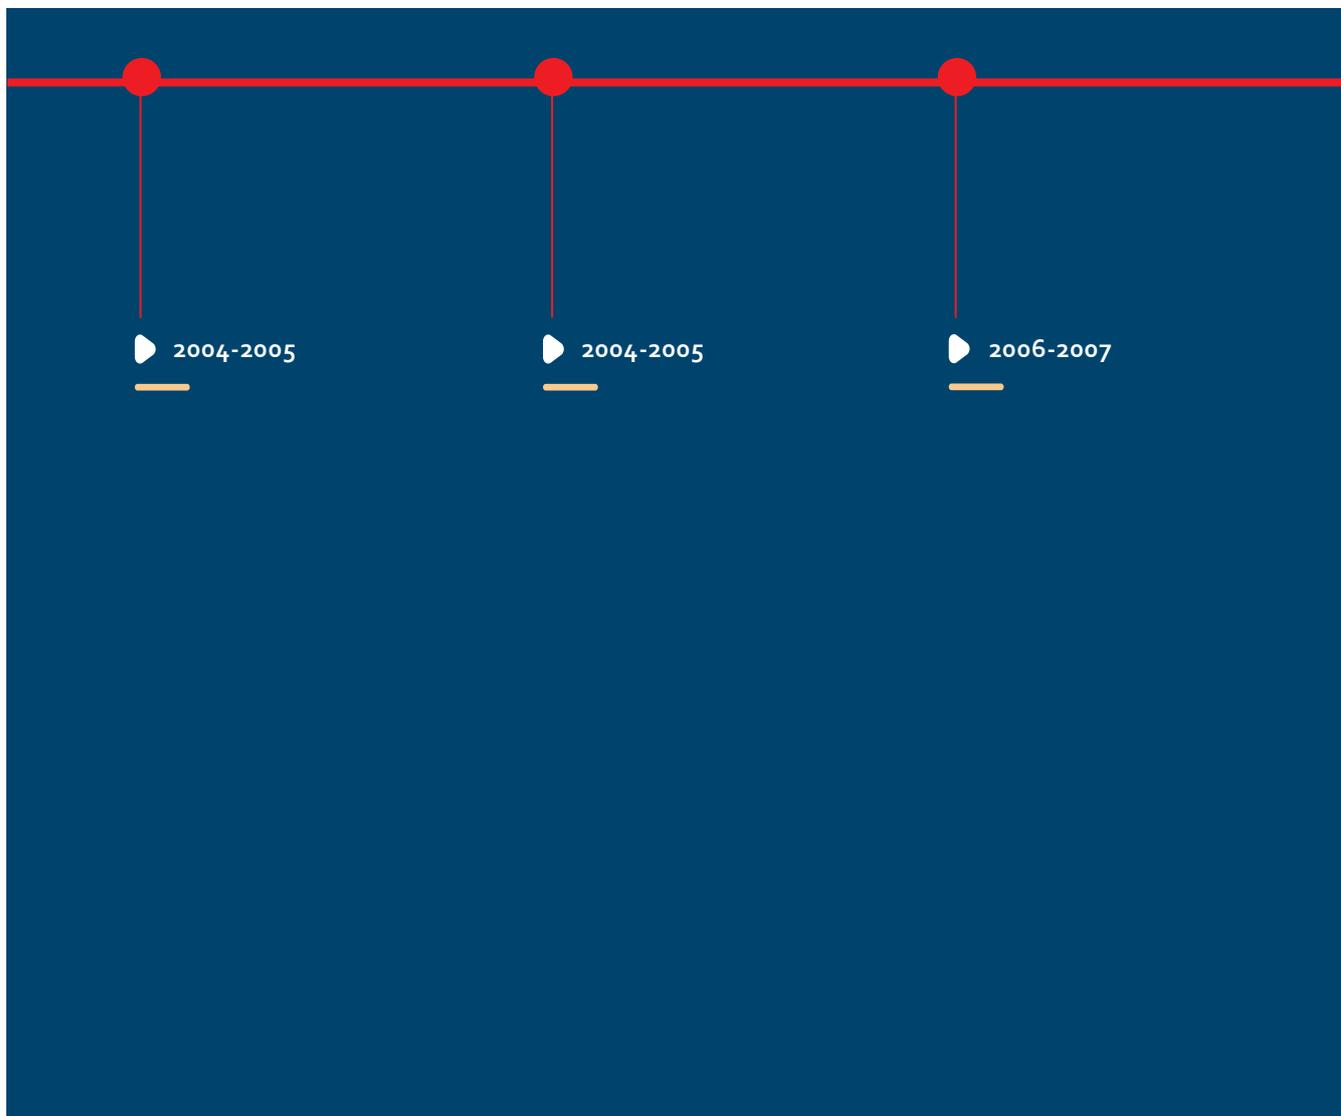

# Our laboratory solutions help you:

- Gain trusted laboratory management and operational system
- Focus on the business's core activities
- Aid in reduce fixed-asset costs
- Benefit from a robust and first-class laboratory services
- Improve the your business processes, by delivering a more efficient laboratory standard, value added resources and expertise, and an apt focus on quality
