

KATCHEY IN THE PUBLIC SECTOR

Science In The Public Sector

When it comes to using science the public sector's requirements can be diverse and multi-varying. Whether it is for policy creation, operationalization of decisions, or for regulation, Katchey has been partnering with governments at Federal and state levels to inject standards in the use of science for governance and for improving the daily lives of citizens.

Katchey Solutions For The Public Sector

Policy & Strategy Development & Implementation

Katchey collaborates extensively with governments in designing the right policy frameworks and implementation strategies for the development of science and the practice of science in different areas. Our experts have contributed opinions and submitted papers in various fora involving the private sector and their public sector counterparts. Katchey drives to get the relevant policy makers to upgrade to 21st Century science.

Standards Development & Implementation Services

Katchey works with governments at both state and federal levels to develop and promote standards for scientific education and research using Digital technology. This extends to helping governments translate scientific requirements from framework agreements into implementable guidelines for the science community to apply in day to day work

Equipment Supply, Installation & Maintenance Services

Katchey provides world class science laboratory solutions and support services that fit the entire value chain and assets life-cycle for organizations and individuals investing in different kinds of science laboratories, including educational, research, quality assurance & control and testing laboratories

Research & Technology Infrastructure Design & Development

Katchey provides complete technical solutions for laboratories and scientific research infrastructure supporting different public sector areas such as the health sector, agriculture, research, science & technology and education. Our design outputs are world class and reflect the best practices for creating the right operating environments to effectively carry out accurate scientific analysis and research

Capacity Building Workshops, Clinics and Skill-Building Training

Training and Capacity building for policy makers and public sector representatives remain an area where Katchey has historically distinguished herself via the provision of extensive and varying types of skill-building programs that address the needs of government practitioners to help them keep abreast of developments in science and technology globally.

Science improves the quality of life of every country's Citizens. Public sector organizations who develop policy, implement same and enforce standards are instrumental to achieving this quality of life. Katchey has the capability to aid governments to better the lives of their citizens. This is a major part of our work.

Major Reference Projects

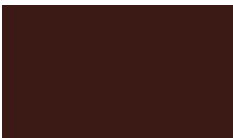

Federal Ministry of Education

The Federal Ministry of Education

In Nigeria, there has been a clear deficit in the quality of science education, mostly attributive to minimal investment and provision of modern science laboratory equipment to enable hands-on learning experience for students.

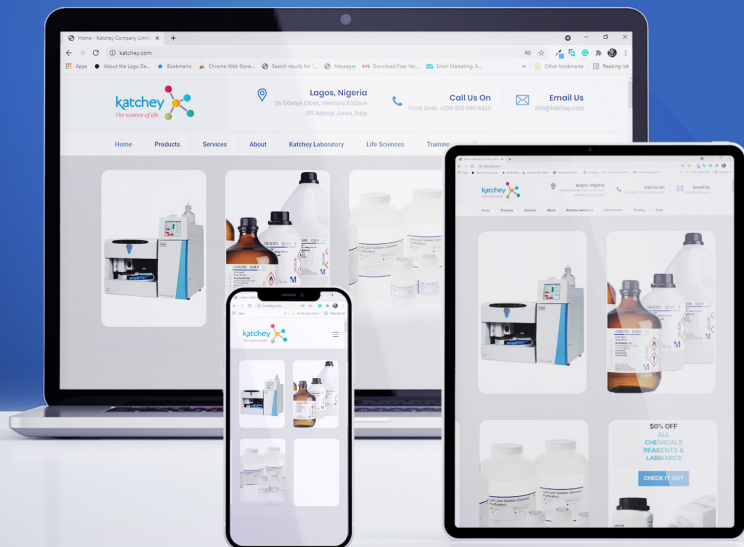

Katchey worked jointly with the federal government in conducting gap analysis in science faculties and departments at schools across the country. The output report presented the minimum requirements for equipping science laboratories in Nigerian Schools and the recommendations were used extensively by the government. We are currently partnering with other governments across Africa to implement STEM digital science laboratory solutions in equipping schools for more effective teaching and assimilation of science. Katchey has adopted the STEM approach to help bring science education in Africa to the 21st century..
